EXPERIENCE

Owner

Aug 2017 – Nov 2022

QuickFix Cellular & PC

- Managed over \$300k annually and repaired more than 2000 devices such as cell phones, computers, and tablets.
- Increased profits by 23% within one year by improving inventory management and optimizing the repair process.
- Prioritized customer service resulting in receiving five stars on 92% of Google reviews over the span of 4 years.

Owner

Jun 2014 – Aug 2017

PC Drop Offs

- Designed and programmed a secure custom kiosk for computer check-ins using Xcode, PHP, and MySQL.
- Negotiated contracts, integrated payment systems, and delivered repair services to businesses valley wide.
- Provided networking and server administration for multiple companies including Banner Health and Caliber.

PROJECTS

Tech Shop POS This point-of-sale app was developed with vanilla JavaScript using Firebase as its database. It was made to be a faster, smaller, cheaper option for independent cell phone, computer, and auto repair shops. It is currently being alpha tested in two locations in Arizona. View the site here: <https://techshop-pos.web.app/>

Once Upon a Wishlist A site created with Express JS using MySQL as its database. Users can create a list of desired gifts and include links, pictures, and details. Friends and family can then reserve those items to ensure there are no duplicate purchases. <https://onceuponawishlist.com/>

EDUCATION

Associates of Programming and Systems Analysis, Rio Salado College

A+ Certification - Network+ Certification - Microsoft Certification, Cisco Network Academy
